### Big Blue 600 Pro

Tackle tough jobs that require high-output for welding, gouging, and auxiliary power.

### Big Blue 600 Air Pak™

All-in-one welder/generator eliminates the need for an auxiliary air compressor. The industrial Ingersoll Rand screw-type air compressor is ideal for gouging and running pneumatic tools.

Welder/generator is warranted by Miller for three years, parts and labor.  
Engine is warranted separately by engine manufacturer.

## Big Blue® 600 Series Features

**Digital meters** with SunVision™ technology enable welding parameters to be viewed with greater clarity than analog meters — at virtually any angle. Meters can be seen clearly even in direct sunlight.

**Standard 14-pin receptacle with Auto-Remote Sense™** for simple connection of remote controls and wire feeders.

**Dynamic DIG™ technology** automatically adjusts the amount of current required to clear a short based on user settings. Delivers a smoother, more consistent arc that can be tailored to match the application, material, fit-up and welder technique.

**Optional vandalism lockout (standard on Deluxe model).** Lockable hinged steel panels cover and protect name plate, gauges and ignition switch (padlock included).

**Optional polarity reversing switch (standard on Deluxe model).** Quickly change welding polarity without having to change over cables.

**Ingersoll Rand ultra-reliable industrial rotary screw compressor (Air Pak models only).** 30,000-hour life expectancy. Independent on/off control for applications not requiring compressed air — allows greater fuel savings and longer compressor service intervals.

**Arc control** is beneficial when welding with stick and solid wires for easier fine-tuning of tough-to-weld materials and out-of-position applications.

**Electronic engine display** simultaneously displays fuel level, engine hours, coolant temperature, oil pressure, battery volts, engine rpm, and air pressure. It also tracks oil change intervals, compressor hours, and displays engine diagnostics for quick and easy servicing.

**Industrial USB port.**

Quickly upload the latest software and download machine log files to retrieve in-depth information such as diagnostics and machine statistics.

**20,000 watts of pure generator power.** Plug in an extra Miller® inverter-based power source for a second welding arc!

**HD powder coat** with zinc-rich primer protects sheet metal from rust and corrosion.

**Standard features** include adjustable Hot Start™, output contactor control, automatic idle, thermal overload protection and 120-volt block heater.

## Welder Truck Specific Models

The Big Blue 600 Series is available in welder truck specific models, which have the critical controls located within easy reach of a ground-based operator when the machine is mounted on the bed of a large-body truck. These versions also include standard hardware upgrades including ArcReach® remote control technology, air cleaner restriction indicators, FA-1D lockable flame arrestor fuel cap **043947** and spark arrestor **195012**. The rear-mounted desiccant air dryer system **195117001** is available as a factory option.

The lower control panel has the following controls: electronic engine display, air compressor on/off switch and engine control switch.

Pair any Miller® ArcReach accessory for complete remote control of welding processes and parameters right at the weld joint.

# ArcReach® Remote Control Technology

## ArcReach®

### Remote control of the power source without a control cord.

An ArcReach system allows you to change weld settings from your ArcReach feeder or remote, saving a trip to the power supply. ArcReach technology uses the existing weld cable to communicate welding control information between the feeder or remote and the power source. This technology eliminates the need for control cords, and their associated problems and costs.

## Big Blue® ArcReach® Additional Features

ArcReach provides remote amperage and voltage control at the weld joint without needing a control cord.

Increased productivity

**More arc-on time and reduced exposure to workplace hazards** for operators can be realized using ArcReach because less time is spent going back to the welding power supply to set process and arc amperage or voltage.

**Auto-Process Select.™** Depending on connected accessory, the system automatically changes to stick or MIG/FCAW (with gas) if electrode positive polarity is detected or TIG or FCAW (no gas) if electrode negative polarity is detected, when ArcReach communication is established between the accessory and the Big Blue — reducing the need to access the power supply.

**Automatic return to panel settings.** System automatically returns to Big Blue setting when ArcReach communication is terminated. For example, if the Big Blue is set to gouging at 500 amps and an ArcReach feeder is connected, the Big Blue will go to a MIG/FCAW process. If the feeder is disconnected, the Big Blue will go back to its previous setting (gouging at 500 amps).

**Less operator fatigue** by not needing to move or reposition heavy secondary weld leads bundled with control cords on the jobsite. Control cables are not used.

Improved weld quality

**Operator can precisely set arc amperage or voltage** at the weld joint and monitor the actual arc voltage and current delivered to the weld using the digital meters on the accessory. This removes guesswork when it comes to adhering to weld procedures.

**Remote override of Big Blue.** When an ArcReach accessory is connected to a Big Blue the accessory has full control and the Big Blue controls are disabled. While under ArcReach control, process and voltage/amperage adjustments are locked out, preventing accidental changes by personnel other than the welding operator.

Reduced maintenance

**Save time** by no longer needing to troubleshoot welding system problems that result from damaged control cords.

**Eliminate costly control cord repairs** because control cords are not used.

Improved flexibility

**Cross platform compatible.** The same ArcReach accessories that work on engine-driven equipment can also be used on select ArcReach-equipped XMT® and Dimension™ power sources.

**Reverse compatible.** ArcReach-equipped power sources work with non-ArcReach accessories; however, the complete ArcReach benefit is only realized with the ArcReach system.

# Function Guide

1. **Self-calibrating digital weld meters with fault code indication** display preset or actual weld parameters.
2. **Weatherproof Lexan® nameplate** is super durable and resists cracking and fading.
3. **Weld process selection switch**
4. **Pushbutton main control knob** used for adjusting amperage/voltage, adjusting arc control, and accessing the service menu.
5. **USB port** allows software updates from a USB drive. A summary file of recoded data from the unit will be saved to a USB drive that is inserted.
6. **Adjustable arc control** adjusts DIG when process control is in stick modes and adjusts inductance when process control is in FCAW or MIG modes. The amount of DIG determines how much amperage (heat) varies with stick arc length. Inductance determines the “wetness” of the weld puddle.
7. **Electronic engine display** can display fuel level, engine hours, coolant temperature, oil pressure, battery volts, engine rpm, air pressure, and compressor hours simultaneously or one at a time. Also tracks oil change intervals and displays engine diagnostics for service technicians.
8. **Standard 14-pin receptacle** for simple connection of remote controls and wire feeders. Includes **Auto Remote Sense™** which automatically switches from panel to remote amperage/voltage (A/V) control with remote connected. Eliminates confusion of a panel/remote switch.
9. **Engine control switch** is used to start engine and then select between auto idle and high speed lock. Glow plug operation is controlled by the engine control module and automatically occurs as needed by ambient conditions.
10. **Air compressor on/off switch** (Air Pak models only)
11. **50 A, 240 V, three-phase receptacle**  
(For matching plug, order **254140**.)
